Abstract: The stability of variable parameters double grid second order cell Cellular Neural Networks (CNN's) linearized in the central linear part of the cell characteristic is investigated by means of Gershgorin's theorem using spatial domain as well as spatial-frequency domain ...

Abstract: This paper presents aspects of a simple methodology to evaluate satellite link quality (especially for downlink segment) using accessible technologies and Satellite PC boards (DVB-S). Traditional methods are based on high end testing communication equipment, ...

Abstract: This paper presents some aspects related to the DVB (Digital Video Broadcasting) investigation. The basic aspects of DVB are presented, with an emphasis on DVB-T version of standard. The main purpose of this research is to analyze the way that the transmission of ...
