**IriShield™-USB  
MK 2120  
(Encased Device)**

**IriShield™-USB  
MK 2121  
(Encased Device)**

**IriShield™-USB  
MO2120 & MO2121  
(Module)**

The IriShield™ Series feature Iritech's superior iris matching and iris image quality assessment algorithms to provide good quality images and avoid false positives while maximizing true positive identification rates. The embedded algorithms can complete a matching query against 1,000 stored templates in 500 milliseconds.

The **IriShield™-USB MK 2120U** and **MK 2121** are ultra-compact and ready-to-use monocular iris cameras, which are highly portable and fashionable looking, ideal for biometric service providers or value-added resellers to develop application systems.

❶ **IriShield™-USB MK 2120U** : close distance camera

❷ **IriShield™-USB MK 2121** : far distance camera

The **IriShield™-USB MO 2120** and **MO 2121** is an auto-capture camera module with on-board iris recognition feature. All components are assembled on a single board smaller than half a credit card in size, ready to be integrated seamlessly into customers' existing product lines.

## Key Benefits

- ⦿ Secure on-board processing
- ⦿ Secure data and communication
- ⦿ Ultra-compact and light weight
- ⦿ Low power consumption
- ⦿ Cost-effective
- ⦿ Support various OS

# IriShield™ Binocular Series

IriShield™-USB BK 2121  
(Without Goggle)

IriShield™-USB BK 2121  
(With Goggle)

IriShield™-UART  
Module

The IriShield™-USB BK 2121U & UART Model are revolutionary design that delivers the highest quality auto-capturing iris acquisition with an ease of use never achieved by older camera systems. The system offers contactless, fast, standards-compliant iris acquisition in a small form factor that is easy to house in a variety of packages.

IriShield™-USB BK 2121U & UART Model include an embedded CPU that enables on-board computing for automated quality-based iris image capturing, verification, and identification without taxing the computing power of the host PC.

- ① IriShield™-USB BK 2120U : camera without goggle
- ② IriShield™-USB MK 2121 : camera with goggle
- ② IriShield™-USB UART 2121 : monocular microchip

## Key Benefits

- ⊙ Built-in Real-time Quality Evaluator and Automated Iris Acquisition
- ⊙ Proven leading algorithms for template generation and comparison
- ⊙ Powerful SDK for easy software development
- ⊙ Safest for eyes: Safe infrared illumination at less than 2% of the LED Eye Safety Standard Regulation
- ⊙ Ready to be integrated with Iritech's enterprise SW environment
